

INF266 AI use anonymous survey

The goal of this anonymous survey is to get a better understanding of **how** students at UiB use AI in their learning. The results of the survey will inform whether and how we should adapt our teaching practices to maximise student learning.

By 'AI' here we mean **Generative AI** that, in particular, is used for text and code generation, summarisation, etc. This includes tools like ChatGPT, Claude, Copilot, DeepSeek, Gemini, Grok, and others.

The survey is anonymous and collected data will be safely stored and used only for the analysis of student AI use. Data will not be shared with any third party, and it will be deleted at the termination of the study. By taking the survey you consent that the data you provide can be used for quantitative analysis for the aim described above. You can also withdraw your consent at any time.

The project is run by the following UiB researchers:

- Rustam Galimullin (Department of Information Science and Media Studies; rustam.galimullin@uib.no),
- Mohammad Khalil (Centre for the Science of Learning & Technology; mohammad.khalil@uib.no),
- Fabio Massimo Zennaro (Department of Informatics; fabio.zennaro@uib.no).

You can contact them if you have questions regarding the survey.

Thank you!
